

2025 Prescription Drug List

TRADITIONAL 5-TIER FOR
QUALIFIED HEALTH PLANS

St Luke'sTM
+ Health Plan

Last updated April 1, 2025

Welcome!

St. Luke's Health Plan Inc. Pharmacy Benefit Manager (St. Luke's PBM) administers pharmacy benefits for the St. Luke's Health Plan (the Plan) to ensure you have access to safe, effective and affordable medications.

Prescription Drug List (PDL)

This document is often referred to as a Prescription Drug List (PDL) or medication formulary and contains a list of the most commonly prescribed outpatient medications covered by your plan. The PDL is typically updated on a quarterly basis. The date of the most recent update can be found in the lower right-hand corner of the document cover page. We do not routinely notify members or providers when the PDL is updated. There will not be any changes that negatively impact members during the plan year. Please use the PDL on the website for the most up-to-date version.

This formulary includes both brand name and generic medications approved by the Food and Drug Administration (FDA). Brand name medications are capitalized and generic medications are in lowercase. Not all medications approved by the FDA are covered under your plan.

The inclusion of a medication on this list does not imply coverage under all plans. Coverage of listed products will be subject to limitations of the prescription medication benefit plan design. Members should consult their prescription medication benefit plan or contact a customer service representative to determine specific coverage at 833-975-1281. Where a difference exists between this document and the benefit plan documents, the benefit plan documents rule.

How to Use the PDL

Members are encouraged to review the PDL to see if currently prescribed medications are covered. Providers and pharmacists are encouraged to review the PDL and utilize it when prescribing for our members. Products on the PDL may not include all strengths or dosage forms associated with the brand name product.

This document is searchable. On your keyboard, press Ctrl+F (Command+F for Mac), type in the medication you are looking for into the search box, and the search function will locate the medication in the document.

Reading the PDL

Within this document, you will find a list of FDA-approved medications covered by the Plan, which tier the medication belongs to, and any specific requirements as required by the Plan. Please see the medication tier explanations in the table below; medications with a lower tier will represent the lowest out-of-pocket costs* for the member.

Tier	Description
ACA	Affordable Care Act Medications may be offered at no cost if the member meets preventive care requirements
1	Preferred Generic Medications offered at a \$0 copay on many of our plans
2	Non-preferred Generic Medications
3	Preferred Brand Name Medications
4	Non-preferred Brand Name Medications
5	Specialty Medications which are limited to a 30-day supply per fill; most specialty medications are required to be filled through St. Luke's Specialty Pharmacy
*Please refer to the plan documents for copay and coinsurance information	

ACA Preventive Medications

The Patient Protection and Affordable Care Act of 2010 (ACA) designates certain categories of medications as “preventive” and requires these categories contain options that are covered at no cost to you. The categories include specific preventive medications for children, women, and adults that you will not have to pay a copay or coinsurance for, even if you have not met your deductible. Please reach out to the PBM help desk for additional information on requirements. Preventive categories are listed below and are designated as ACA on the PDL.

- Bowel prep agents for people aged 45-75 years (max of 2 per year)
- Folic acid for women of childbearing age
- Iron supplements for children between 6-12 months
- Contraceptives
- Oral fluoride supplements for children up to age 5
- Preventive breast cancer medications for women aged 35 years or older with prior breast cancer diagnosis
- Tobacco cessation products (max of 182 days per year)
- Certain vaccines (flu, shingles)
- Statins for people aged 40-75 years
- Select antiretrovirals for preventive use

High Deductible Health Plan Preventive Medications

Recognizing that preventive services can lead to improved health by identifying and treating illnesses early, the Plan does not require High Deductible Health Plan (HDHP) participants meet their deductible prior to covering generic medications in some medication categories. If you are enrolled in a HDHP you will not have to meet your deductible before the Plan contributes to the cost of your generic prescription for medications. HDHP preventive categories are listed below and are designated as “PREV” on the PDL.

- Anticonvulsants
- Asthma and COPD
- Brand contraceptives
- Cardiovascular (including cholesterol, blood pressure and blood thinners)
- Diabetes (Insulin, Non-Insulin, and Test Strips)
- Mental health (antipsychotics and antidepressants)
- Osteoporosis

How are Medications Assessed for Plan Coverage

The PDL reflects the current judgement of the Pharmacy and Therapeutics (P&T) Committee, which consists of physicians, pharmacists and medical experts. The Committee reviews medications in each therapeutic class for safety, effectiveness and cost of treatment. Then, agents are selected in each category for inclusion/exclusion on the formulary. The maintenance of the formulary is a dynamic process where new medications and information concerning existing medications are continually reviewed by the P&T Committee.

Generic Medications

The St. Luke's PBM prioritizes the use of generic medications whenever possible. The term generic is usually used to describe a less-expensive product that is a safe and effective alternative to a brand-name product. A generic medication is identical, or bioequivalent, to a brand name medication. Although generic medications are chemically identical to their branded counterparts, they are typically sold at substantial discounts. The Food and Drug Administration (FDA) works with pharmaceutical companies to ensure medications (both brand name and generic) meet specific requirements for quality, strength, purity and potency.

Generic Medication Substitution Requirement

If you purchase a brand name medication when a generic substitution is required, you must pay the difference between the Allowed Amount for the Generic medication and the Allowed Amount for the Brand Name medication, plus your Copay/ Coinsurance or Deductible. Some prescription medications are excluded from this requirement.

Coverage Requests

If you would like to request a prior authorization, a higher quantity limit, bypassing step therapy or formulary exception, please have your provider call the St. Luke's PBM at **833-975-1281** to obtain the appropriate form. For formulary exceptions due to medical necessity, the request should include medical records that describe the condition being treated, other treatments previously tried and reason for not using formulary alternatives.

Pharmacy Network

Our pharmacy network is broad, and you can find a pharmacy near you with the lookup tool on your pharmacy member portal.

The Plan offers a maintenance pharmacy benefit, allowing you to obtain up to a 100-day supply of certain medications through St. Luke's Outpatient Pharmacies or St. Luke's Mail Order Pharmacy. Some exceptions may apply.

Specialty medications are high-cost medications used to treat rare or complicated conditions. Specialty medications are listed as tier 5. Most specialty medications are required to be filled through St. Luke's Specialty Pharmacy which offers best in class care and support. To learn more, call **208-205-7779**.

Plan ID Card

Your Plan ID card works for both your doctor's visits and filling medications at the pharmacy. To get the most from your benefits, provide your pharmacy ID card to the pharmacy when dropping off or calling in your prescription.

Term and Acronym Dictionary

ACA- Affordable Care Act:

This medication is covered for some people at no cost based on the Affordable Care Act.

AL1- Age Limit:

This prescription medication may only be covered if you meet the minimum or maximum age limit.

PA – Prior Authorization:

Selected high-risk or high-cost medications may require prior authorization to be eligible for coverage under the member's prescription medication benefit.

PREV - High Deductible Health Plan Preventive Medication:

This medication is covered prior to the deductible for high deductible health plans.

QL or QLC - Quantity Limit or Quantity Limit (Custom):

This medication has a limit on the amount of medication per prescription.

S- Specialty Medication:

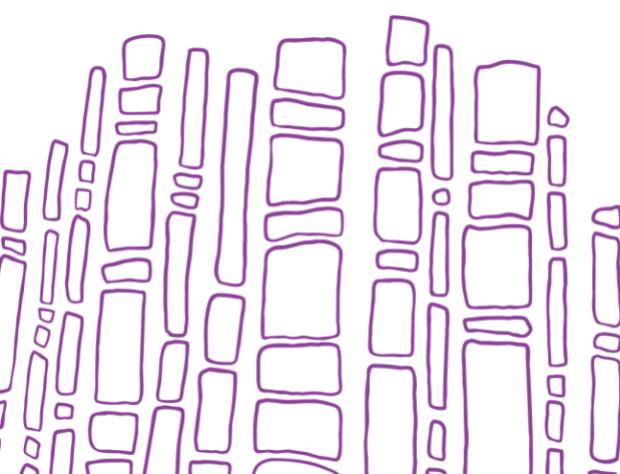

This medication is a specialty medication.

ST - Step Therapy:

This medication requires you to have already tried an alternative medication(s) preferred by the Plan. This process is called "step therapy." The alternative medication(s) is generally a more cost-effective therapy that does not compromise clinical quality.

STC- Step Therapy Criteria:

This is the medication(s) that must be tried prior to using the requested medication.
