

# Great benefits. Happy employees.

## Better benefits for better health.

St. Luke's Health Plan and Delta Dental of Idaho have teamed up to provide specialized dental benefits designed specifically for employer group health plans. Together, we know that better overall health equals healthier communities and a happier bottom line. Through thoughtful collaboration, your employees get next-level patient care and additional health-sustaining benefits.

---

## Why the partnership?

More than 90% of all systemic diseases are linked to oral health, and with collaboration between care providers, existing or new conditions can be recognized and treated more comprehensively.

St. Luke's is committed to improving the health of our communities through affordable, accessible care. As a not-for-profit health system, we've helped Idahoans get healthy and stay healthy for 120+ years. St. Luke's Health Plan is making it even easier to enjoy high-quality care that emphasizes oral health with the help of our partner, Delta Dental of Idaho.

## What does this mean for your employees?

St. Luke's Health Plan employer groups can purchase trusted dental services through Delta Dental of Idaho alongside their health plan. Plus, employees who are pregnant or have certain medical conditions—such as cancer, diabetes and heart disease—qualify for enhanced dental benefits, like additional cleanings or fluoride treatments, to help combat oral health issues associated with these conditions.
